

MARKET SUPPLEMENT PROGRAM

**Report of the Market Supplement Review
Committee**

**Physical Therapist
(Degree and Senior Levels)**

Final

November 12, 2020

OBJECTIVE

The objective of the Saskatchewan Market Supplement Program is to ensure that the Saskatchewan Health Authority can attract and retain the employees required to provide appropriate health care services to the people of Saskatchewan.

This program is designed to address specific skill shortages, by use of a temporary market supplement to attract and/or retain qualified employees. The program is designed to ensure that temporary market supplements respond to valid labour market criteria, to address recruitment and/or retention pressures.

OVERVIEW

The Market Supplement Review Committee (MSRC) reviewed updated documentation submitted in the annual review process regarding the market supplement for the Physical Therapist classification. The initial market supplement report was released by the Market Supplement Review Committee on August 6, 2002, and implemented on October 16, 2002. The market supplement rate of pay for Physical Therapists was increased in February 2006, September 2010 and November 2013. This latest report is to be considered as part of the ongoing review of the market supplement process for this classification.

There were eleven areas included in this analysis of the Physical Therapists. Physical Therapists are members of the Health Sciences Association of Saskatchewan (HSAS).

Role of a Physical Therapist:

Physical Therapists (PTs) work collaboratively to enhance clients'/patients' abilities within environments and communities in which they live and work. They provide preventative, diagnostic and therapeutic services aimed at maximizing function and helping people achieve their highest quality of life through physical movement. They also provide individualized treatment of an injury or disability based on scientific knowledge; a thorough assessment of the condition; environmental factors; and lifestyle.

The major areas of client/patient programs that are supported by Physical Therapists may include neurological, musculoskeletal and cardio-respiratory. Physical Therapists assess and treat patients in a number of inpatient and outpatient settings. There are both generalist skills required, as well as highly specialized skills, dependent upon the setting and the patient group.

Qualifications:

The Physical Therapist Program at the University of Saskatchewan is a Master's level program. The University of Saskatchewan graduates approximately 40 Physical Therapists per year. Other Physical Therapy programs in western Canada are located at the University of Manitoba, the University of Alberta and the University of British Columbia.

Information regarding budgeted positions and vacancies is provided in the following table:

Table 1- Physical Therapist – Budgeted and Vacant Positions

Number of Budgeted Positions (As of November 2020)		Number of Vacant Positions (As of November 2020)		% Vacancy	
Full-Time	Part-Time	Full-Time	Part-Time	Full-Time	Part-Time
233	96.25	21.6	12	9.27%	12.47%

ANALYSIS

The MSRC discussed the Labour Market Criteria as required by the Market Supplement Program framework.

SERVICE DELIVERY IMPACTS: *(Respondents were asked to provide information that addresses current service delivery impacts resulting from staff shortages; potential staff short-term service delivery impacts; potential long-term service delivery impacts; and options for alternative service delivery models.)*

Eleven areas participated in this review. Three respondents reported no service delivery issues related to recruitment and retention. Four reported minor to moderate issues which are impacting wait lists and the timeliness of service delivery, particularly in outpatient services and Long Term Care. One respondent reported moderate issues impacting wait times. Three areas reported they have experienced significant service delivery impacts causing an increase in wait lists and delays and reductions in service delivery.

Several areas reported using Therapy Assistants to assist with service delivery, where appropriate. On occasion, clients with private insurance and non-priority patients are encouraged to seek service in the private sector.

VACANCY RATE ANALYSIS: *(Respondents were requested to provide information about the frequency and timing of vacancy occurrences {i.e., seasonal vacancies; do the vacancies always follow an event; etc.}, and to identify trends that may affect recruitment/retention efforts.)*

There were 21.6 full-time and 12 part-time vacancies reported for this classification, for vacancy rates of 9.64% and 12.87% respectively.

TURNOVER RATES: *(Respondents were asked to provide local analysis of reasons for leaving and trends that may be emerging. They were also asked to provide annual turnover {loss of employees to other competitor employers} ratio to the existing staff complement {budgeted positions} in the given occupation.)*

Of the respondents that track and report turnover, the following data was reported for this review:

- Last 12 months – 23 (5 other employment; 7 other reason; 1 family/domestic; 3 retirements; 7 retirements/other reasons).
- Previous 12 months = 10 (3 other employment; 3 retirements; 4 other reasons).

RECRUITMENT ISSUE ANALYSIS: (Respondents were asked to provide information such as length of recruitment times; training investments; licensing issues; supply and demand issues, etc.; as well as information that would identify trends that may affect recruitment and/or retention efforts.)

One respondent reported no recruitment issues, three reported minor issues, and two reported moderate issues.

Typical recruiting and retention efforts were reported, including:

- advertising;
- attending career fairs/networking, and holding special recruitment events for students;
- providing recruitment and relocation allowances;
- offering practicums/internships and mentoring to students; and
- providing the opportunity to work as a Restricted License Clinician to prepare for the licensing exam.

Some respondents noted it is difficult to compete with larger, urban areas when recruiting.

SALARY MARKET CONDITIONS: (Respondents were asked to identify situations where their salary levels are lower than other employers that they would expect to recruit employees from, or other employers that recruit their employees. This may be local, provincial, regional, national or international, depending on the occupation group and traditional recruitment relationship. Cost of living considerations may or may not be appropriate to factor into market salary comparisons.)

The MSRC reports the following market conditions for Physical Therapists (Degree) amongst the three prairie provinces. The SHA pays comparable to British Columbia, more than Manitoba (who pay 9.39% less) and less than Alberta (who pay 13.71% more).

- Saskatchewan Health Authority – minimum \$36.585/hour, maximum \$44.843; effective April 1, 2021.
- British Columbia Regional Health Authorities – minimum \$35.98/hour, maximum \$44.68/hour; effective April 1, 2021.
- Alberta Health Services – minimum \$37.30/hour, maximum \$49.65/hour; effective April 1, 2019.
- Manitoba Regional Health Authorities – minimum \$35.053/hour, maximum \$40.632/hour; effective April 1, 2021.

CONCLUSIONS AND RECOMMENDATIONS

Considering the labour market criteria under the provincial framework, the Market Supplement Review Committee makes the following conclusions:

- Three respondents reported no service delivery issues related to recruitment and retention. Three reported minor to moderate issues which are impacting wait lists and the timeliness of service delivery, particularly in outpatient services and Long Term Care. One respondent reported moderate issues impacting wait times. Two areas reported they have experienced significant service delivery impacts causing an increase in wait lists and delays in service delivery.

- There were 21.6 full-time and 12 part-time vacancies reported for this classification, for vacancy rates of 9.64% and 12.87% respectively.

Having reviewed the information as provided by employers, and considering the labour market criteria, the Market Supplement Review Committee has determined that the current market supplement should be **maintained**.
